EXPERIENCE

SOFTWARE & SYSTEMS INTERN – PENNACOOL.COM CARIBBEAN LIMITED

JAN 2026 – PRESENT | TRINIDAD & TOBAGO

- Refactored and modernized legacy Moodle 3.10 plugins, redesigning UI/UX and improving functionality while ensuring full compatibility with Moodle 4, aligning with updated platform architecture and standards.
- Developed and maintained full-stack web pages and APIs within Moodle using PHP, JavaScript, and Mustache templates.
- Worked in a Dockerized environment, using tools like Grunt, Adminer, and MailHog for build automation, database management, and email testing.
- Assisted in server and database administration using Linux (Ubuntu), Apache, and MySQL/MariaDB, including backup and recovery processes.

PROJECTS

MINI BURP SUITE [GITHUB]

- Built an authorized defensive web vulnerability scanner MVP with a React + Vite + Tailwind frontend and Node.js/Express + MongoDB backend.
- Implemented host-restricted crawling, passive security checks, limited non-destructive active checks, MongoDB persistence, and a findings dashboard with scan summaries and detail views.
- Designed safeguards to avoid out-of-scope domains, destructive routes, logout links, downloads, credential attacks, and exploit delivery.
  Technologies: **React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, Axios, Cheerio**

AI-POWERED PHISHING EMAIL DETECTOR [GITHUB] [DEPLOYMENT]

- Built and deployed an AI-powered phishing email detection platform using React, Node.js, Express, MongoDB, FastAPI, and scikit-learn.
- Developed a hybrid detection engine combining machine learning with rule-based phishing indicators to classify emails, generate risk scores, and explain flagged content.
- Designed a responsive security dashboard with analysis history, indicator highlighting, file upload support, and cloud deployment across Vercel, Render, and MongoDB Atlas.

DENTAL CLINIC MANAGEMENT SYSTEM [DEPLOYMENT] [ADMIN PANEL]

- Designed and developed a web-based clinic management system for Bright Smiles Dental using the MERN stack (MongoDB, Express.js, React, Node.js).
- Implemented modules for patient records, appointment scheduling, and treatment tracking with secure role-based login using JWT.
- Applied Agile development methodology with continuous feedback and sprint-based iterations.
- Technologies: **React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Git**
